# PRODUCT DESCRIPTION

Basic set of accessories for Apliweld-E: cleaning brush for conductors, slag removal spade, mould brush, cavity cleaning brush, sealer compound and safety gloves.

Cleaning tool set for conductors and moulds. It includes safety gloves and sealing paste.

Before the welding clean conductors using AT-061N brush.

At the end of the welding process, an adequate cleaning increases the mould life andprepares it for the following welding. Take care in this step; the mould is still very hot.

1. Remove the slag in the crucible using slag removal spade (AT-063N), screwingdown to scrape it off. If slag persists, a hammer could help. Handle with care notto damage the mould.

2. Use AT-062N cleaning brush after for a complete cleaning of the crucible. Thistool is also suitable for cleaning the cover in the electronic starter holding place.Do not use this tool to clean the welding cavity.

3. Clean welding cavity, tap hole and conductors location using AT-064N brush.

4. Check the mould is already clean, with no impurities and with correct open and close movements.
