CATEGORY: Copper-clad steel bimetal conductors  
 NAME: **30x3mm copper-clad steel conductor**  
 REFERENCE: **AT-251D**

### PRODUCT DESCRIPTION

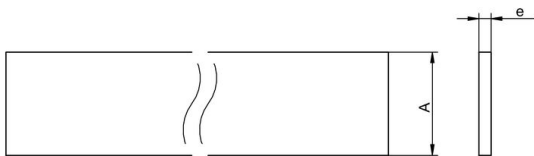

Copper-steel conductors (Cu 25%) maintain the electrical characteristics of the electrolytic copper, along with the best mechanical properties of steel.

Tape has larger surface for the same amount of material than cables and therefore has less resistance, less inductance and generates less electric fields.
