

D CABLE LASHING WIRE CLAMP

Lashing Wire Clamp is used for telco and CATV aerial plant to terminate and hold the end of the lashing wire, either at an interruption in continuity or at the end of the lashing wire coil. Also used to hang terminals and splice cases from strand.

- Two grooved plates fit on opposite sides of the strand.
- Plates secured by a threaded stud with a flanged shoulder and washer to block slippage, and two hexagonal nuts: one on the long end of the stud to tighten the clamp, one on the other end to terminate the wire against the two washers.
- A mechanical galvanized finish provides extra corrosion resistance.

SPECIFICATIONS

Material	Galvanized steel
Usage	Used for fixation of lashing Wire
Surface treatment	Galvanized
Messenger strand	1/4"-7/16"
